Memorandum of Mr. Spencer on January 18 meeting re
Matters Pertaining to Science in Germany

Enclosed is memorandum of meeting prepared by Mr. Spencer, concerning a number of matters pertaining to science in Germany. It is assumed that the next step is to get a determination of policy within the Department after which an interdepartmental agency understanding can be reached.

Within the Department U/SA, GER, and R are primarily concerned. In order to assist you in expediting the necessary coordination, GER gives its approval to the policies set forth in the memorandum. The following clarifications are suggested:

In the 3rd line of the first paragraph beginning on page 2, "ECG" should be changed to "MSA." At the end of Section D on page 3, the following should be added: "Any program for the removal of German scientists in the event of hostilities is a separate problem." Regarding the last sentence in Section F on page 4, it would perhaps be more accurate to say the following: "If it is determined that a complement of U. S. personnel is needed to observe the extent of German compliance with whatever prohibitions may be set forth in the contractual arrangements, this complement would be very small." In any event, intelligence pertaining to activities in restricted or prohibited fields should be made available to the Ambassador.

It is understood that Mr. Sidney Buford in OLI is the one to contact in obtaining clearance from R.

Enclosure:

is stated
